

### Optimum retention

The CombiE ear tags are made of soft, flexible polyurethane, which tolerates a wide range of temperatures, sunlight and wear throughout the lifetime on an animal. The material and design ensure optimum retention.

- Ultra-light EID ear tag
- Suitable for newborn sheep, goats and pigs
- FDX-B technology, 134,2 kHz
- ISO 11784 and 11785 compliant. ICAR product code 937002
- Button tag: diameter 23 mm
- Combine with a male part from the Combi 2000<sup>®</sup> or Combi 3000<sup>®</sup> ear tag systems, in the sizes Mini, Small or Button
- Weight: 2.8 grams  
With male part Mini: 4.5 grams  
With male part Small: 5.1 grams  
With male part Button: 5.8 grams
- Available in a reusable version for management purposes.
- Supplied in red, green, blue, yellow, orange, grey and pink

### Tamper evident attachment

Once attached, the two parts of a tag cannot be separated in normal use. A deliberate attempt to split a tag will break off the tip held fast in the female part, which prevents fraudulent reuse of Combi 3000<sup>®</sup>.

The unique locking system is patented:  
EP 0913083 / AUS 755275 / NZ 332424 /  
US 6,385,877

### Laser printing

Alphanumeric characters, bar codes and logos are laser printed and remain legible throughout the lifetime of the animal.

### Application

Apply with a Combi Junior or Combi Senior applicator. Both attachment and use are animal welfare friendly.

The puncture heals quickly, and the enclosed shaft tip prevents contagion.
